ABOUT ME

I currently have one and a half years of software test engineering experience in the field of quality and assurance at Vodafone. I have remote working experience in the Scrum model at Vodafone and Softtech. Since I constantly want to improve myself, I carry out individual projects in order not to forget the backend services from my past experiences. I aim to work in Tokyo in the future with my self-taught Japanese. <https://github.com/malikagan48>

EDUCATION AND TRAINING

WORK EXPERIENCE

Software Engineering Intern

Uzman CRM [25/07/2021 – 19/09/2021]

I have completed my 40-day compulsory professional practice training. I worked on SQL and ASP.NET in the company.

Backend Intern (.Net,Vue.js)

Softtech A.Ş. [20/02/2022 – 06/06/2022]

I spent my Spring Semester Workplace training at Softtech. I worked as frontend and backend in the card acceptance platform team. I took part in active projects over C# and Vue.js.

Junior QA Test Engineer

Vodafone [01/01/2023 – Current]

1. We tested Vbu products in the Polaris Product team for approximately a year. While doing our tests, we completed the tests using Siebel, CCS, Sql, Jira and Vodafone automation applications.
2. Meeting with the automation testing team in our project, where test processes are tested manually, and contributing to the development of our test automation.
3. Playing an active role in the maintenance processes of projects whose testing processes are carried out manually.
4. Predetermining errors that may occur in the future by making analyzes during testing processes
5. Providing support and presentations to my own team and offer teams in manual and automation invoice printing with vibe database checks.
6. Currently working on the CBU project. In the CBU project, I actively carry out my tests using Siebel, CCS, Sql, Jira, SOAP, Postman, Swagger and vodafone automation applications.
7. Managing the team and taking responsibility when necessary. Also make presentations to increase the knowledge of the team
